

NOVAGARD
PERFORMANCE SILICONES

*You talked,
we listened!*

In the past year, we updated the NovaFlex Silicone Tile Grout cartridge to NovaFlex Tub Surround Sealant & Tile Grout. While this is the same great product formulated for grouting the joints between ceramic tiles, we have received feedback from our customers that the new packaging is confusing.

We appreciate the feedback, and will be transitioning to a product name and cartridge that is closer to the original packaging. In the meantime, you can still purchase the NovaFlex Tub Surround Sealant & Tile Grout and get the product performance that you know and love.

- Low odor
- Mold & mildew resistant
- Easy troweling and tooling
- Skins over in 10 – 30 minutes
- Completely cured in 24 hours
- Never any cracking or chipping
- Colored from the factory – no mixing required
