# Aluma-Seal 94 Foam 🔊

### DESCRIPTION

Foam Seal Aluma-Seal 94 is an industrial, low density, closed cell PVC foam cast on an aluminum liner. The foam is formulated to conform to UL HF-1/HBF\* and is a recognized component of Underwriters Laboratories<sup>®</sup>.

## **APPLICATIONS**

Foam Seal Aluma-Seal 94 is used for applications requiring (UL 94 HF-1/HBF) conformance but does not automatically transfer UL ratings to the customer's product. Aluma-Seal 94 remains pliable from 20°C to 78°C.

Foam Seal Aluma-Seal 94 is used for appliances, pipes, and pans to prevent condensation build-up on surfaces to which it is applied.

## STORAGE

Product shelf life begins on the date of production as referenced by the lot number. Foam Seal Topper-Seal has a shelf life of 6 months when stored at or below 75°F.

### ADDITIONAL INFORMATION

Effective Date: 03/24/2021

Foam Seal/Novagard believes that the information provided is a true and accurate description of the typical characteristics of the aforementioned product; however, it is the responsibility of the individual user to thoroughly test the product in their specific application to determine performance, efficacy, and safety.

\*UL 94 HF-1/HBF Rating is gauge dependent.

## **PRODUCT SPECIFICATIONS\*\***

Parameter	Condition	Specification
Gauge (Thickness)	1/16" to <1/8" 1/8" to <3/16" 3/16" to 1/2"	+/- 20% +/- 15% +/- 10%
Width (Rolls)	3/16" to <2" wide 2" to 52" wide	+/- 1/32" +/- 1/16"
Length	≤ 50' long > 50' long	0" to 6" - 1% to + 2%
Density (lbs/cu ft)	1/16" to 1/2"	6.2 - 10.0
Adhesion	Stainless steel	20 oz / in minimum Typical value: >30 oz/in

\*\*Foam without adhesive or liner unless noted. Specifications based on a sample size of three to five. Testing to these specifications may be dependent on the specific application. Specifications are subject to change without notice.

# TYPICAL PROPERTIES

	Test Method	Typical Values
Hardness (Shore "00")	ASTM D2240	26
Force to Compress @ 25 %	ASTM D1667	1.5 psi
Compression Deflection	ASTM D1667	0.5 psi
Water Absorption	ASTM D1056	8%
Tensile Strength (psi) (Die A)	ASTM D412	70
Elongation (%) With Adhesive	ASTM D412	150%
Elongation (%) Without Adhesive	ASTM D412	160%
UL File Number	94 HF-1/HBF	E 112126 (QMFZ2)

The information provided in the above table is not intended for use in preparing specifications. Information for reference is intended as a general guideline only. Typical values based on a sample size of three to five and performed within 2 weeks of manufacture.
